New Generation Diamond Chains

The SAWSHARK Chain Series

► Overall Solutions

Toolgal Sawshark chain is made of segments developed in-house for each application. Toolgal's R&D team is involved throughout the complete process from the steel components, segment quality, welding and final assembly. Batch sampling is carried out in-house to ensure the products' quality and consistency.

► Metallurgical Solutions

Toolgal's KR70 is a special bond and diamond sandwich solution, strengthening the sides, while keeping a fast cutting overall character.

► The Bulk Concept

The Bulk Concept gives the customer the ability to create his own chain, per its specific requirements. By using Toolgal chain and assembly kit, a new chain for any particular task - takes merely a few minutes to assemble and avoids the need to hold stock.
