Industrial Diamond Tools

Pre Stressed Concrete Blades

A number of factors make the cutting of pre-stressed concrete a challenging operation:

- The pressure on the beam
- Thickness and number of wires
- A large variety of aggregates
- Special cutting speed requirements

Toolgal's expert team will select the most suitable tool, specially adapted for your particular cutting application. Our segments have been developed for this particular application, using special bonds and high quality grits, ensuring long life and high cutting speed.

Toolgal, with its advanced and controlled production facility, will provide you with consistent quality tools for your cutting needs.
