## Ring Drills

Toolgal is producing rings and ring drills mainly for the stone industry.

Standard qualities are kept in stock for hard stone, regular stone, glass and concrete drilling.

Standard height is 6-8 mm with a pad usually added, and a concentrating step, as shown in above drawing, is lathed.

Standard diameters and thickness of rings are:

6 to 45 mm OD by 1.5 mm thickness – for glass and porcelain.

8 to 75 mm OD by 2 to 3.5 mm thickness – for all types of stone.

16 to 45 mm OD by 2 to 3 mm thickness – for concrete.

Other diameters and thicknesses can be ordered.
