### *Accessories*

Compatible high quality guide bars, sprockets and chain parts with total manufacturer warrantee

### *Complete Kit*

Provides a compatible answer for most common chain cutting machines in the market

### *Bulk Concept*

Solution for most efficient stock management

### *Technical Support*

Directly from the manufacturer

## *Bulk Concept & Assembly Kits*

- Cut to size
- Repair capability
- Small stock
- Large flexibility
- Do It Yourself – training end-users to use the assembly kit, thus saving logistic costs

## *Important note for planning*

Usually a guide bar wears out every 2 to 3 chains and a sprocket wears out every 5 to 6 chains

The type of work and the material, water supply and operator skill affects the lifespan of the accessory
